

Notes To Self While Working on Project 4

Laz R

November 23, 2024

debug cout stmts

- ★ 2:52p *AST* :: *mainHeader* ... *while* ((**obj* → *tag*) ≠ " *function* ")
- ★ 3:10 jesus I should really have just used markdown or a txt file
- ★ 3:38 two for loops inside *AST*::*mainHeader* to print out name of profile and file
- ★ `std::cout && includeProfile && std::endl;` (inside the for loop making the header to print)
